

2020

ANNUAL REPORT

INVESTEES HIGHLIGHT HI-TEC PROFILES INC.

\$9 MILLION | INDUSTRIALS

Hi-Tec Profiles is a Regina-based steel-processing company that services agricultural and industrial equipment manufacturers throughout Western Canada. Founded in 1995, Hi-Tec's operations are a fundamental step in the production of agricultural equipment such as grain vacs, combines, swather headers, augers, sprayers, harrows as well as equipment used in potash mines and steel mills, electrical transformers, general construction projects and numerous other miscellaneous items within the industrial manufacturing sectors.

TO OUR VALUED SHAREHOLDERS,

To our valued shareholders,

2020 has been and continues to be a challenging time for many people and businesses in Saskatchewan. In the early days of the Covid-19 crisis, we worked to ensure that PFM and all our portfolio companies were providing a safe working environment for their staff. Our next priority was to ensure that their balance sheets were strong enough to withstand the downturn.

Our management team, which is second to none, were successful in navigating the early part of the downturn. To date, we have not had to support any of our portfolio companies with unanticipated cash injections. This fact alone confirms the strength of our portfolio companies, their staff and the management teams that operate them.

It is a testament to our investment strategy and to the resilience of our portfolio companies that they have withstood the downturn as well as they have, but what else would you expect from Saskatchewan-based enterprises? In Saskatchewan, we come together as a community when needed, we operate conservatively, and we work hard – that is a recipe for long-term resilience like no other. As we move through the rest of the Covid-19 crisis, SaskWorks is prepared to support our existing portfolio companies as they need, and we're also ready to support their continued growth as we exit the crisis. With our support, many of our portfolio companies may be able to acquire competitors or find other creative ways to outpace their peer group.

The Fund is actively looking to add new investees to its portfolio. As has been the case in other downturns faced by the Fund, many companies will see growth opportunities as the global economy rebounds. SaskWorks is well positioned to support Saskatchewan's business community through its rebound. The Fund is excited to partner with new enterprises wherever possible.

Despite challenges stemming from the Covid-19 pandemic, the Fund has been able to make a successful exit of the Factory Optical Group of Companies. The initial investment was made following the market downturn of 2008, with subsequent follow on investments to support the growth of the company leading to the successful exit in 2020.

In a year like 2020, we know that many people were impacted by the Covid-19 pandemic and some may not be capable of saving as much for their retirement as they had planned. The affordability of SaskWorks, given the 32.5% tax credit associated with the Fund, makes it an especially strong candidate at this time. An investor can use the tax credit to make the investment more affordable, or they can use it to increase their savings in a challenging year.

Other savings options, such as our payroll investment plan which allows an investor to take advantage of the tax credit at source on every pay check or pre-authorized debit plans, can help smooth out the cost of saving for shareholders and help to build a healthy savings balance for retirement or other future needs.

As always, we endeavor to invest in the best-managed companies that represent a broad cross-section of the Saskatchewan economy, in order to provide our investors with strong long-term returns. We believe that Saskatchewan, as an exporter of food, fuel and fertilizer to the rest of the world is well positioned to rebound as we exit the Covid-19 pandemic.

We sincerely hope that you and your family stay healthy and safe throughout this challenging time, and thank you for your support of SaskWorks Venture Fund Inc.

Sincerely,

Randy Beattie
President & CEO

Terry Schneider
Chair

It is a testament to the resilience of our portfolio companies that they have withstood the downturn as well as they have, but what else would you expect from Saskatchewan-based enterprises?

INVESTEES HIGHLIGHT
**HARBOUR LANDING
VILLAGE**

\$16.7 MILLION | FINANCIALS

Harbour Landing Village is a greenfield senior housing development located in south Regina. The offering consists of independent, assisted and supportive senior living as well as childcare services. Additional amenities include an onsite restaurant and coffee shop, home care services, wellness activities and social events.

MANAGEMENT REPORT OF FUND PERFORMANCE

This management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the Fund. The complete annual financial statements of the Fund are included later in this annual report or can be obtained, at no cost to you, by calling 1-306-791-4833, by writing to us at 1925 Victoria Avenue, 2nd Floor, Regina, Saskatchewan, S4P 0R3, or by visiting our website at www.saskworks.ca or SEDAR at www.sedar.com

Shareholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or annual report.

The Fund will provide promptly and without charge a Statement of Portfolio Transactions – Short-term, Long-term and Venture Investments (unaudited) upon request by any shareholder of the Fund at 1925 Victoria Avenue, 2nd Floor, Regina, Saskatchewan, S4P 0R3.

The purpose of this section is to summarize the performance of SaskWorks Venture Fund Inc. ("SaskWorks" or "the Fund") for the year ended August 31, 2020.

Unless otherwise indicated, references to amounts at August 31, 2020 or to the year ended August 31, 2020 are specific to the Fund's Class A shares and Class R shares in aggregate.

SaskWorks is a publicly accountable enterprise and investment fund to which the Canadian Securities Administrators' National Instrument 81-106, "Investment Fund Continuous Disclosure" is applicable and International Financial Reporting Standards ("IFRS") apply.

Beginning January 2016, the Fund began offering its Class A and Class R shares in series. Class A Series A and Class R Series A shares have a sales and trailer commission associated with them while Class A Series F and Class R Series F do not.

Net assets attributable to holders of redeemable shares per share for each series is calculated at the end of each week by dividing the net assets attributable to holders of redeemable shares for each series by its outstanding shares. The net assets attributable to holders of redeemable shares of each series of a class is computed by calculating the value of the series-specific assets and the series' proportionate share of the class' common assets less the series-specific liabilities and the series' proportionate share of the class' common liabilities. Income and expenses directly attributable to a series are charged to that series while common class income and expenses and realized and unrealized gains and losses are allocated to each series. A proportionate share of or allocation to each series of a class is based on that series' pro rata share of the total share capital of that class as at the latest weekly net asset valuation.

COVID-19

At August 31, 2020 the full economic impacts of the COVID-19 pandemic were not yet known. Venture investment valuations at year end reflect the effects of the pandemic to date which in most cases resulted in negative adjustments compared to 2019. However, additional adjustments after August 31, 2020 may be necessary as the full impact becomes known and are better understood. If additional adjustments are required, it is expected these will have a negative effect on the net assets of both Class A and Class R shares. Any negative adjustments because of the pandemic and any additional negative adjustments may be temporary and could reverse if the economy improves.

The pandemic also influenced investment activity with both placement and exits down compared to 2019. Overall investment and divestment activity tends to slow in times of acute certainty. Income from venture investments was impacted less with most investees able to maintain their contractual and other payments to the Fund.

INVESTMENT OBJECTIVE AND STRATEGIES

The Fund invests in small and medium-sized Saskatchewan eligible businesses, with the objective of achieving long-term capital appreciation and/or a recurring income stream. The Fund may also participate in investment groups and consortia in situations where an investment opportunity involves a larger investment than the Fund is allowed or believes prudent to make by itself.

Under *The Labour-sponsored Venture Capital Corporations Act* (Saskatchewan) ("the Saskatchewan Act"):

- › eligible investments for the Fund ("eligible investments") are investments in eligible businesses, defined as taxable corporations or limited partnerships that carry on

business in Saskatchewan, that together with related corporations or limited partnerships, do not have more than 500 employees, and that in the taxation year preceding the investment paid at least 25% of all their wages and salaries to employees of their permanent establishment in Saskatchewan;

- › direct investments in public companies with a market capitalization of \$500,000 or more are prohibited. Once an investment has over \$500,000 in capitalization, such investment must be disposed of within five years from the end of the fiscal year of the Fund of such acquisition or merger;
- › new investment in agricultural land acquired primarily for rental or leasing purposes is prohibited; and
- › the Fund is required to have innovation sector investment exposure of 25% of annual net capitalization defined as annual capital raised within the Fund less annual capital redeemed, multiplied by the Fund's 75% pacing requirement.

The Fund may not invest more than 10% of the net assets attributable to the holders of redeemable Class A and Class R shares of the Fund in any one eligible business and may not invest in an eligible business if the Fund and the eligible business are not at arm's length, within the meaning of the Saskatchewan Act. In respect of any investment, the Fund will take into consideration any anticipated follow-on or subsequent investment, either by way of debt or equity. Such a subsequent investment will typically be made only if the investee meets certain tests, such as timing and performance targets that were fixed at the date of the original investment in the eligible business.

The Fund will seek out eligible investments in both rural and urban centers throughout Saskatchewan.

Desirable investment opportunities for the Fund are businesses that provide an opportunity for a return on investment commensurate with the perceived risk. It is anticipated that investments will be in businesses which are at one of the following stages of development:

- › **Expansion Financing.** Investment in businesses that require financing to expand sales, or to launch a new product or service.
 - › **Management/Employee Buyouts.** Investment where the proceeds of the financing are used to acquire control of a business that has significant expansion potential that can be realized by adding new management and capital.
 - › **Restructurings or Turnarounds.** Investment in businesses which have the potential to succeed if additional investment is received and/or changes in management, staffing, operations or marketing strategies are made.
 - › **Early-Stage Investments.** Investment will be in businesses which have been in operation for a period but have not yet fully developed their product or service. Typically, funding will be required to address limitations or opportunities that have been identified after the initial business plan.
- Prospective eligible investments will be expected to demonstrate some or all of the following characteristics:
- › a strong and experienced management team which is financially committed to and rewarded by the company's success;
 - › a strong competitive position because of superior technology, innovative products, comparative cost advantage, established market position, significant barriers to entry and/or dominant distribution in its market;
 - › with respect to expansion funding, a reasonable expectation of earnings growth based on past financial performance or a strong likelihood of new market success;

- › with respect to start up or early stage funding, a sound business concept or plan which presents a convincing opportunity to establish a comparative business advantage in a growth market;
- › with respect to term debt, a reasonable level of unencumbered and disposable net asset security coverage and good interest/principal coverage being generated from current cash flows;
- › with respect to subordinated debt funding, a satisfactory level of current cash flow interest coverage with the likelihood for near term coverage improvement; and,
- › with respect to management buyout opportunities, a strong current cash flow position coupled with the opportunity for near term earnings improvement resulting from a competitively enhanced new business or operating environment.

The Fund's Class A shares will attempt to reduce overall risk by diversification of investments in various sectors within Saskatchewan including:

- › Value-added agricultural;
- › Manufacturing;
- › Oil and gas development and related services;
- › Industrial minerals;
- › Forestry;
- › Destination tourism; and,
- › Information technology.

The Fund's Class R shares focus on investments in the Province's resources sector - specifically oil and gas development, related services, and mining.

The form of the Fund's investments is selected and negotiated after taking into account the investment criteria and guidelines of the Fund, the long-term requirements of the investee business, the stage of development of the investee business, the investee business' requirements, the ability to negotiate downside protection, and tax considerations. The Fund diversifies its investment portfolio

using such instruments, among others, as common shares, convertible debentures, convertible preferred shares, debt with equity participation, secured debt, funded loan guarantees and bridge loans.

Where the Fund makes an investment by way of a loan, such investment is expected to be secured by a charge over the investee business' assets but may be subordinated to other lenders' security.

The Fund may guarantee loans of eligible businesses and in such circumstances the making of such loan would permit the growth and development of the business without the Fund being the primary investor. The aggregate of loan guarantees may not exceed 10% of the Fund's total assets at the time each loan guarantee is provided. The Fund intends to maintain a liquid reserve of 25% of the guaranteed amount on any loan guarantees. The Fund will maintain liquid reserves in term deposits and high-quality government and corporate debt obligations.

To the extent possible, investments are diversified by the expected holding period of the investment. Generally, the average holding period is expected to be five to eight years. The Fund may choose to refinance its investment through an arm's length third-party where the expected return can be achieved in a shorter time frame. All investment recommendations will include a strategy for realization on investments made. Possible exit strategies include the following:

- › refinancing with conventional lenders or leasing companies;
- › sale of the business or investment to a third-party;
- › a public offering; and,
- › sale of the investment back to the business or its principals through exercise of a put or call contractual provision included within the equity securities arrangement.

MANAGEMENT REPORT OF FUND PERFORMANCE (CONTINUED)

RISK

(in thousands of dollars)

The primary risk related to an investment in the Fund is the fact that the Fund must continually identify and evaluate investment opportunities that meet its eligibility criteria. A further risk is that many of these investments are made in small and medium sized private companies that are by their nature illiquid. In addition, the process of valuing private investments is more complex and subjective than that of valuing publicly traded securities.

Over the course of the year ended August 31, 2020, the Fund continued to demonstrate its ability to identify and close on eligible venture investment opportunities. The Fund's Class A shares purchased \$8,389 (2019 - \$48,524) and the Class R shares purchased \$nil (2019 - \$709) of venture investments.

In addition, \$4,571 has been committed by the Fund's Class A shares and \$537 by Class R shares to future, but not yet disbursed, transactions.

With respect to liquidity risk, the Fund continues to exit its investments, with \$4,819 (2019 - \$16,012) at cost in dispositions of venture investments from Class A and \$899 (2019 - \$7,859) at cost from Class R shares during the year ended August 31, 2020. These exits resulted in a \$12,069 (2019 - \$12,253) net gain for the Class A shares and a \$nil net gain (2019 - \$8,463) for the Class R shares over the life of those investments.

With respect to valuation risk, since inception, the Fund has not exited an investment, whether at a loss or for a gain, at an amount materially less than the carrying value of that investment.

RESULTS OF OPERATIONS

(in thousands of dollars, except for per share amounts)

The Fund decreased its Class A venture investment portfolio at fair value by \$24,151 (2019 - \$37,023) and decreased its Class R portfolio by \$10,833 (2019 - \$11,780) over the year ended August 31, 2020.

Venture investments, at cost, made up 59.1% of Class A's and 100.7% of Class R's net assets attributable to holders of redeemable shares at August 31, 2020, as compared to 53.4% of Class A's and 68.1% of Class R's net assets at August 31, 2019. Venture investments at fair value (cost plus/minus unrealized appreciation/depreciation) comprised 73.2% of Class A's and 78.7% of Class R's net assets at August 31, 2020, as compared to 73.3% of Class A's and 69.7% of Class R's net assets at August 31, 2019.

The Fund's cash, long-term, and short-term investments totaled \$123,904 (2019 - \$135,129) in Class A and \$10,736 in Class R (2019 - \$23,657). When the Fund's objective of maintaining a proportion of share capital in investment grade securities and approved but undisbursed transactions are considered, \$74,064 (2019 - \$83,232) for Class A and \$1,555 (2019 - \$12,255) for Class R of these cash, long-term, and short-term investment balances are available for investment in venture transactions. A relatively large cash balance must be maintained to support follow-on investments with the Fund's portfolio of investee companies. Lastly, a reserve is maintained to satisfy potential redemption requests related to shares that have matured, but which remain outstanding.

The loan receivable attributable to Class A shares decreased to \$9,625 (2019 - \$10,057) at August 31, 2020 and the loan receivable attributable to Class R shares decreased to \$1,110 (2019 - \$1,551). The loan receivable is due from Conexus Credit Union which is the party responsible for administering and paying the base and additional commissions to the Fund's agent and subagents. The loan increases as commissions are paid on new share sales and decreases as Conexus makes annual repayments.

The accrued provision for incentive participation amount decreased from \$38,994 in Class A and \$6,066 in Class R at August 31, 2019 to \$35,046 in Class A and \$2,845 in Class R at August 31, 2020. These changes are due to the performance of the portfolio over the year ended August 31, 2020 and the payment to the fund manager in September 2019 of a portion of the accrued bonus that pertained to realized gains occurring in the 2019 fiscal year. Of the incentive participation amount at August 31, 2020, \$2,683 (Class A) and \$nil (Class R) relates to profitably exited investments which meet the incentive participation amount

criteria. The balance is an accrual amount dependent on the future carrying values and performance of the remaining venture investment portfolio.

Proceeds from the issuance of Class A Series A shares was \$30,455 during the year ending August 31, 2020, an 5.6% decrease over the same period in 2019. Proceeds from the issuance of Class R Series A shares was \$1,299 during the year ending August 31, 2020, a 33.4% decrease over 2019. Proceeds on the issue of Class A Series F shares were \$2,080 (2019 - \$2,103) and proceeds on issue of Class R Series F were \$22 (2019 - \$54) for the same period.

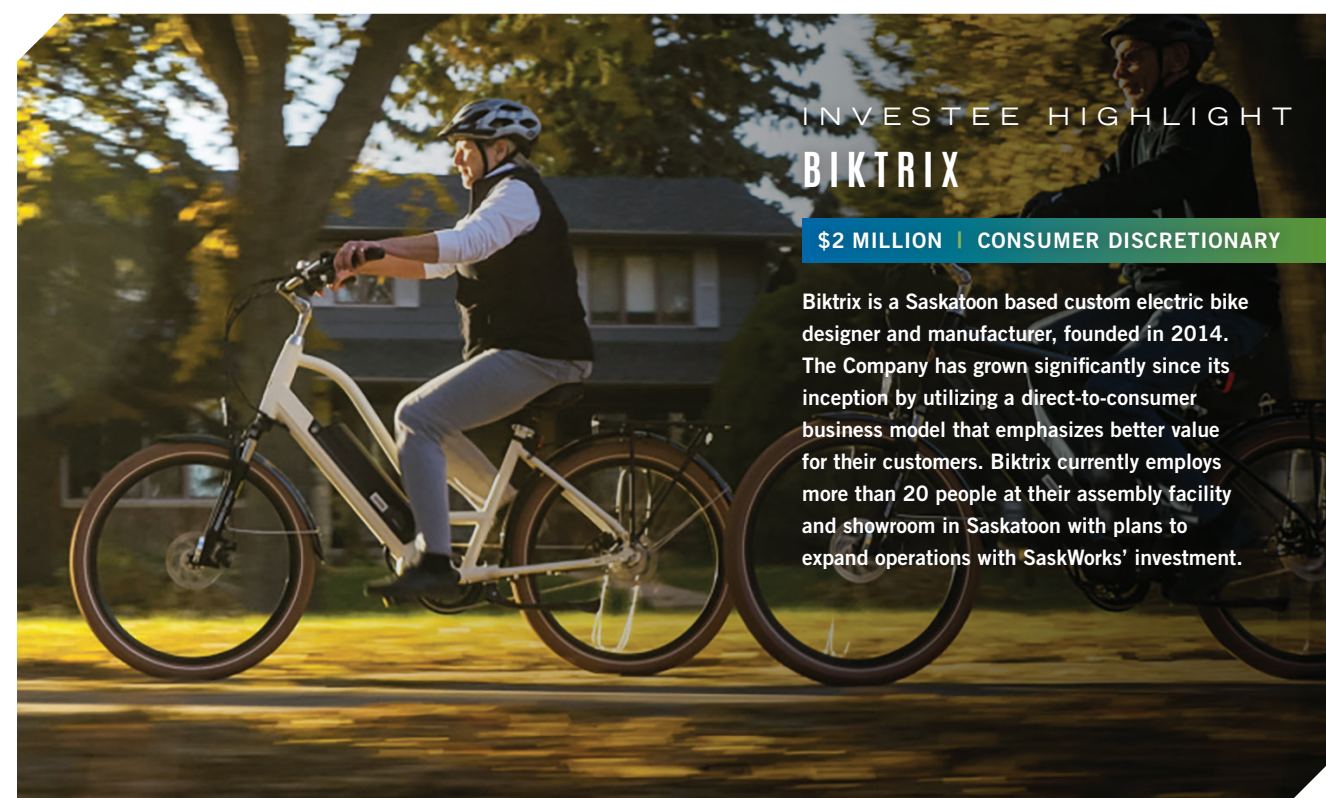

Redemptions of Class A Series A shares were \$45,544 during the year ending August 31, 2020 compared to \$41,145 during the same period in 2019. Redemptions of Class R Series A shares were \$12,192 during the year ending August 31, 2020, as compared to \$11,301 for the same period in 2019. Redemptions of Class A Series F shares were \$12 (2019 - \$29) during the period. The number of shares redeemed are expected to increase over the next several years as shares purchased during the Fund's highest sales years begin to mature. As in past years, a significant portion of the shareholders who redeemed shares during the period re-invested in the Fund.

The Fund's revenues related to Class A shares increased from \$11,913 for the year ended August 31, 2019 to \$12,482 for the same period in 2020 and the revenues related to Class R shares decreased from \$1,044 in 2019 to \$709 in 2020. As a component of revenues, income from the Fund's venture investments increased from \$7,677 to \$9,046 for Class A shares and decreased from \$519 to \$365 for Class R shares over the reporting period. The increase/decrease in income from venture investments in Class A and Class R was a result of a change in the number of income-producing investments in the portfolio.

The expenses of the Fund, excluding incentive participation amount, related to Class A shares decreased from \$16,609 for the year ended August 31, 2019 to \$16,430 in 2020 and the expenses related to Class R shares decreased from \$3,061 in 2019 to \$2,297 in 2020. Most of the Fund's recurring expenses are a function of net assets or share activity. As net assets and/or share activity increase or decrease so to do those recurring expenses increase or decrease.

The net investment loss of the Fund attributable to Class A shares for the year, before gains and losses on dispositions of venture investments, net changes in unrealized appreciation on venture investments and provision for incentive participation amount, was \$4,857 (2019 - \$4,962). Once gains and losses on dispositions of venture investments, the net change in unrealized appreciation on venture investments, and the provision for incentive participation amount is considered, the Class A shares had a decrease in net assets from operations for the year of \$19,553 (2019 - increase \$5,490). The comparative period in 2019 featured significantly more unrealized appreciation gains than the same period in 2020.

The net investment loss of the Fund attributable to Class R shares for the year, before gains and losses on dispositions of venture investments, net changes in unrealized appreciation on venture investments and provision for incentive participation amount, was \$1,661 (2019 - \$2,126). When gains and losses on dispositions of venture investments, the net change in unrealized appreciation on venture investments, and the provision for incentive participation amount are considered, the Class R shares had a decrease in net assets attributable to the R shares from operations for the year of \$9,895 (2019 - increase \$469).

INVESTEE HIGHLIGHT
BIKTRIX
\$2 MILLION | CONSUMER DISCRETIONARY

Biktrix is a Saskatoon based custom electric bike designer and manufacturer, founded in 2014. The Company has grown significantly since its inception by utilizing a direct-to-consumer business model that emphasizes better value for their customers. Biktrix currently employs more than 20 people at their assembly facility and showroom in Saskatoon with plans to expand operations with SaskWorks' investment.

MANAGEMENT REPORT OF FUND PERFORMANCE (CONTINUED)

RECENT DEVELOPMENTS

(in thousands of dollars)

At the Fund's Annual General Meeting of Shareholders held on December 13, 2019, the Fund's sponsor, as the holder of the Class B shares, resolved to re-elect Terry Schneider as a director for a three-year term. The holders of Class A and R shares resolved to re-elect Kevin Stangeland as a director for a three-year term and Michael Fix for a one-year term.

National Instrument 81-107 ("NI 81-107") requires an Independent Review Committee to be established which is mandated to review conflict of interest situations which may arise for a fund manager, particularly in cases where management involves different segments within a fund and/or management of related funds.

In accordance with NI 81-107, the initial members of the Independent Review Committee were appointed by SaskWorks by May 1, 2007 and full compliance with NI

81-107 was achieved by November 1, 2007. Effective May 1, 2007 the Manager established an Independent Review Committee comprised of three independent and unrelated persons, appointed on a rotating term basis. The three members of the Independent Review Committee are Berny Gross, of Regina, Saskatchewan, an entrepreneur and owner of a mechanical contracting company, (term expires December 2022); William Johnson, Q.C., B.A., LL.B., B.C.L. (OXON), lawyer and partner of the law firm of Gerrard Rath Johnson of Regina, Saskatchewan (term expires November 2020); and Douglas Johnson, CPA, CA, of Regina, Saskatchewan (term expires November 2020).

The Independent Review Committee is responsible to report annually to shareholders and an annual committee report is required to be filed on SEDAR. This annual committee report was made available to shareholders following the August 31, 2019 fiscal year end.

The Provincial Government announced continued support for the labour-sponsored program in Saskatchewan, with the provincial tax credit remaining steady at 17.5% and a maximum annual sales cap of \$35 million. The federal tax credit remains at 15%.

RELATED PARTY TRANSACTIONS

(in thousands of dollars)

PFM Venture Capital Operations Inc., the manager of the Fund, was paid \$10,086 (2019 - \$10,334) in management fees, including applicable taxes, related to Class A shares and \$1,278 (2019 - \$1,711) in management fees, including applicable taxes, related to Class R during the year ended August 31, 2020. In addition, the provision for the incentive participation amount payable to the manager, subject to the fulfillment of specific payment criteria, decreased \$3,948 related to Class A shares and \$3,221 related to Class R shares for the 2020 fiscal year, to a total provision, including applicable taxes, of \$35,046 in Class A and \$2,845 in Class R.

FINANCIAL HIGHLIGHTS

(in thousands of dollars except number of shares and per share amounts)

The following tables show selected key financial information about the Fund's share class series and are intended to help you understand the Fund's annual (or interim if indicated) financial performance for the past five years. This information is derived from the Fund's annual audited or interim financial statements.

⁽⁴⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of weekly average net asset value during the period.

MANAGEMENT REPORT OF FUND PERFORMANCE (CONTINUED)

MANAGEMENT FEES

The manager (PFM Venture Capital Operations Inc.), as compensation to manage and administer the business affairs of SaskWorks, including management of its' venture investment portfolio, receives an annual management fee equal to 2.5% of the aggregate net asset value of the Class A Series A, Class A Series F, Class R Series A and Class R Series F shares, as at each weekly valuation date. The fee is calculated and payable monthly in arrears.

The manager is also entitled to an incentive participation amount, subject to satisfying certain conditions, equal to 20% of the return, before expenses, based on realized gains and cumulative performance of individual venture investments. An incentive participation amount is due only upon realization of an individual venture investment and payable on an annual basis.

Class A Series A Shares

Class R Series A Shares

PAST PERFORMANCE

General

The past performance of the Fund does not necessarily indicate how the Fund will perform in the future

The following charts illustrate:

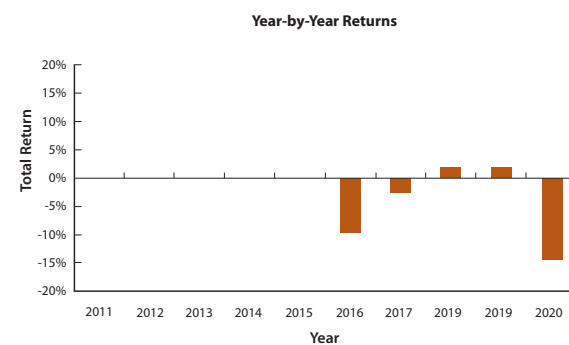

- ▶ the annualized performance of each series of class of shares for the periods shown, and how the series' performance has changed from period to period (September 1 to August 31 or September 1 to February 28/29 for interim); and
- ▶ in percentage terms, how much an investment made in each series of shares on the first day of each fiscal period (September 1) would have increased or decreased by the last day of the fiscal period (August 31 or February 28/29 for interim).

Class A Series F Shares

Class A Series F shares were first available for sale beginning January 1, 2016.

Class R Series F Shares

Class R Series F shares were first available for sale beginning January 1, 2016.

ANNUAL COMPOUND RETURNS

The table below shows the annual compound returns of the Fund for varying time periods for each of the years since the inception of the Fund. The Canadian Investment Funds Standards Committee ("CIFSC") Retail Venture Capital Index is used as a reference. Funds in the Retail Venture Capital Index include but are not limited to Labour Sponsored Investment Funds (LSIF) and other related funds that receive special tax benefits for investing in Canadian venture capital.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

To the Shareholders of **SaskWorks Venture Fund Inc.**:

The accompanying financial statements of **SaskWorks Venture Fund Inc.** (the "Fund") and other financial information contained in the annual report are the responsibility of management. The financial statements have been prepared by management based on the information available to October 15, 2020, are in accordance with International Financial Reporting Standards, and reflect management's best estimates and judgments.

Management has established systems of internal controls which are designed to provide reasonable assurance those assets are safeguarded from loss or unauthorized use and to produce reliable accounting records for the preparation of financial information.

The Board of Directors discharges its responsibility for the financial statements primarily through the activities of the Audit and Valuation Committee (the "Committee"), which is comprised of members of the Board of Directors.

The Fund determines the value of its Class A Series A, Class A Series F, Class R Series A, and Class R Series F shares on an annual basis by means of a valuation that is reviewed by the Fund's external auditors.

The Committee meets with management and the external auditors to discuss the results of the valuation and the audit examination with respect to the adequacy of internal controls and to review the financial statements of the Fund. The Committee also considers, for review by the Board of Directors and approval by the shareholders, the engagement or reappointment of the external auditors.

The accompanying financial statements have been approved by the Board of Directors and have been audited by MNP LLP, Chartered Professional Accountants. The auditors' report outlines the scope of their audit and their opinion on the financial statements.

INDEPENDENT AUDITORS' REPORT

Independent Auditors' Report

To the Shareholders of SaskWorks Ventures Fund Inc.:

Opinion

We have audited the financial statements of SaskWorks Ventures Fund Inc. (the "Fund"), which comprise the statements of financial position as at August 31, 2020 and August 31, 2019, and the statements of comprehensive income, changes in net assets attributable to holders of redeemable shares and cash flows for the years then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at August 31, 2020 and August 31, 2019, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Basis for Opinion

We conducted our audits in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audits of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report and management report of fund performance, but does not include the financial statements and our auditor's report thereon. The annual report and management report of fund performance is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audits or otherwise appears to be materially misstated.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

INDEPENDENT AUDITORS' REPORT (CONTINUED)

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits and significant audit findings, including any significant deficiencies in internal control that we identify during our audits.

NOTES TO THE FINANCIAL STATEMENTS

For the years ended August 31, 2020 and 2019

(in thousands of dollars except number of shares and per share amounts)

1. Status of the corporation

SaskWorks Venture Fund Inc. ("SaskWorks" or the "Fund") was incorporated under the laws of the Province of Saskatchewan by articles of incorporation dated September 1, 1999 under the name Prairie Ventures Fund Inc. Effective December 18, 2000, the articles of the Fund were amended to change its corporate designation to Crown Ventures Fund Inc. and effective March 16, 2005, the articles of the Fund were amended to change its corporate designation to SaskWorks Venture Fund Inc. The Fund has received approval for registration as a labour-sponsored venture capital corporation under *The Labour-sponsored Venture Capital Corporations Act* (Saskatchewan) (the "Act"). The Fund commenced active operations on January 29, 2001.

In February 2006, the Fund began offering a second class of shares, Class R, in addition to its Class A shares, for sale to the public.

Beginning January 1, 2016, the Fund began offering its Class A and Class R shares in series. The existing Class A and Class R shares were renamed Class A Series A and Class R Series A shares respectively. New shares, Class A Series F and Class R Series F, began sale to the public. Class A Series A and Class R Series A have a sales and trailer commission associated with them while Class A Series F and Class R Series F do not.

A separate net asset value is calculated for each of the Class A Series A, Class A Series F, Class R Series A and Class R Series F shares. The holders of Class A Series A, Class A Series F, Class R Series A, and Class R Series F shares have recourse only to the net assets attributable to the capital raised through the issuance of Class A Series A, Class A Series F, Class R Series A, and Class R Series F shares respectively.

The Fund was formed to make debt and equity investments in Saskatchewan small and medium-sized businesses. The objective of the Fund is to realize long-term capital appreciation from its investments. Targeted investment opportunities include early stage and mature businesses with substantial growth prospects as well as restructurings and management buy-out opportunities that offer superior investment return prospects.

PFM Venture Capital Operations Inc. ("PFMV" or the "Manager") is responsible for the management of the Fund and has engaged TBW Holdings Inc. and PFM Capital (2010) Inc. to assist it to carry out its management obligations.

2. Basis of presentation

(a) Statement of compliance:

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). The Fund's significant accounting policies under IFRS are presented in Note 3.

The financial statements of the Fund were approved by the Board of Directors' on October 15, 2020.

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis, except for all financial assets at fair value through profit or loss ("FVTPL") which are measured at fair value.

(c) Investment entity

The Fund has determined that it meets the definition of investment entity and as a result, it measures investee companies at FVTPL. An investment entity is an entity that: obtains funds from one or more investors for the purpose of providing them with investment management services, commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both, and measures and evaluates the performance of substantially all of its investments on a fair value basis. The most significant judgement that the Fund has made in determining that it meets this definition is that fair value is used as the primary measurement attribute to measure and evaluate the performance of substantially all of its investments.

(d) Functional and presentation currency

The financial statements are presented in Canadian dollars, which is the Fund's functional currency, and all values are rounded to the nearest thousand dollars except where otherwise indicated.

(e) Use of judgements and estimates

The preparation of financial statements requires management to use judgement in applying policies and to make estimates and assumptions about the future. The following are the most significant accounting judgements and estimates that the Fund has made in preparing the financial statements:

Fair value of investments not quoted in an active market

The Fund holds financial instruments for which no public market exists (“private companies”). Fair values of such instruments are determined using valuation techniques. Where no market data is available, the Fund will value positions using its own models, which are usually based on valuation methods and techniques generally recognized as standard within the industry. The models used for private companies are based mainly on earnings multiples adjusted for a lack of marketability as appropriate.

Investment entity

In determining whether the Fund is an investment entity, the Fund may be required to make significant judgments about whether the Fund has the typical characteristics of an investment entity. The Fund primarily obtains funds from investors for the purpose of providing investment management services, commits to its investors that the business purpose is to invest the funds solely for returns from capital appreciation, investment income or both, and measures and evaluates the performance of its investments on a fair value basis.

3. Significant accounting policies

The following policies are considered significant:

(a) Financial instruments

Initial recognition and measurement

The Fund recognizes financial instruments at fair value upon initial recognition. Financial assets are initially recognized on the trade date, which is the date on which the Fund becomes a party to the contractual provisions of the instrument. Other financial assets are recognized on the date on which they originated. The Fund’s venture investments and other financial assets are measured at FVTPL, including investments in debt instruments which have been designated at FVTPL. All financial liabilities, including redeemable shares, are measured at amortized cost. Under this method, financial liabilities reflect the amount required to be paid, discounted when appropriate, at the contract’s effective interest rate. The Fund’s accounting policies for measuring the fair value of its venture investments are identical to those used in measuring its net asset value (“NAV”) for transactions with shareholders.

Fair value measurement

The fair values of venture investments in eligible businesses, having quoted market values and being publicly traded on a recognized stock exchange (“publicly traded companies”), are recorded at values based on the closing bid price on the last Thursday of each month, except August, and on the last business day of August.

The fair value of the Fund’s venture investments for which no public market exists (“private companies”) is determined as at the last business day of each fiscal quarter on the basis of policies and procedures established by the Board for determining the fair value of such investments. These valuations are updated monthly to take into account any material changes in the investments of the Fund since the most recent quarterly valuation.

In determining the fair value of equity investments in private companies (“shares”) material changes would include, but are not limited to: a subsequent round of financing; an independent valuation; where performance varies adversely relative to the Fund’s expectations; where performance indicates the value of the investment has changed; or, a share transaction by an independent third party. Equity investments are carried at fair value and an estimate of fair value is determined on the basis of the expected realizable value of the shares if they were disposed of in an orderly manner over a reasonable period. Fluctuations in fair value are recorded as unrealized appreciation or depreciation until disposal of the equity investment.

Investments in debt instruments (“loans”) are carried at fair value. For loans an estimate of fair value is determined using a discounted cash flow methodology with fluctuations in the fair value recorded as a premium or discount, through unrealized appreciation, that is amortized to income using the effective interest method. If a loan is impaired because there is no longer reasonable assurance of the timely collection of the full amount of principal a write-down or other provision is established, through unrealized depreciation, to reduce the carrying value to the estimated fair value of the underlying security.

(b) Investments in associates, joint ventures and subsidiaries

An associate is defined as an investee over whom the Fund has significant influence, being the power to participate in the financial and operating policy decisions of the investee (but not control or joint control). Significant influence exists when the Fund owns between 20% and less than a majority of the voting rights of the investee.

Joint control involves contractually agreed sharing of control and arrangements subject to joint control are classified as a joint venture.

A subsidiary is defined as an investee over whom the Fund has the ability to control. The Fund controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Control over an investee:

- exists when the Fund owns a majority of the voting rights of the investee; or
- exists when the Fund has a majority position in any borrowings of the investee and the conditions attached to the borrowings confer on it the right to assume control of the investee in the event of default.

The Fund meets the criteria required to be considered an “investment entity” under IFRS 10 – *Consolidated Financial Statements* and, as such, it accounts for subsidiaries at fair value. Associates and joint ventures have been designated at FVTPL.

Information about the Fund’s interest in associates or unconsolidated subsidiaries is as follows:

Investee	Relationship	Ownership & voting interest %	Senior debt
255 2nd Ave. Properties Ltd.	Associate	50.00%	Yes
All-Fab Building Components Inc.	Associate	40.07%	-
Avalon Oil & Gas Ltd.	Associate	23.47%	-
Elgin Development	Associate	25.81%	Yes
Foundation Developments	Associate	30.40%	Yes
Hi-Tec Profiles Inc.	Associate	39.96%	-
James Hill Road Villa LP	Subsidiary	70.05%	-
Lazar Equipment Ltd.	Subsidiary	53.94%	-
Moody’s Equipment LP	Subsidiary	71.37%	-
Parkside Townhomes	Subsidiary	84.26%	-
Pines Sports & Marine Ltd.	Subsidiary	44.55%	Yes
Prairie Soil Services Inc.	Subsidiary	68.65%	Yes
TAM International Inc.	Associate	44.78%	-
Urban Heights Inc.	Subsidiary	79.93%	-
Yorkterra Development LP	Associate	32.37%	-

All investee companies have Canada as their principal place of business and country of incorporation.

All investee companies for which the Fund is a subordinate lender may have restrictions on dividend and loan repayments if the investee is not within covenants imposed on it by its senior lender(s).

With respect to the above associates and unconsolidated subsidiaries:

- subject to senior lender covenants, if any, there are no significant restrictions on the ability of the associates or subsidiaries to transfer funds to the Fund in the form of cash dividends or to repay loans or advances made to the associates or subsidiaries by the Fund;
- there are no current commitments or intentions to provide financial or other support to the subsidiaries, including commitments or intentions to assist them in obtaining financial support;
- the Fund has not, without the contractual obligation do so, provided any financial or other support to the subsidiaries; and
- other than the original amount approved for investment, there are no contractual arrangements that would require the Fund to provide financial support to the subsidiaries.

(c) Cash

Pending venture investments being made, a portion of subscription proceeds are invested in interest bearing accounts yielding interest at the rate of prime minus 0.10% to prime minus 1.60%.

(d) Redeemable shares

The Fund classifies financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments.

The shares, which are classified as financial liabilities and measured at redemption amount, provide shareholders with the right to request redemption, subject to available liquidity.

See Note 7 for details of the Fund's shares.

(e) Net assets attributable to holders of redeemable shares per share

The net assets attributable to shareholders per Class A Series A, Class A Series F, Class R Series A and Class R Series F share is determined by dividing the net assets attributable to shareholders of Class A Series A, Class A Series F, Class R Series A and Class R Series F shares by the number of Class A Series A, Class A Series F, Class R Series A and Class R Series F shares outstanding as at that date.

(f) (Decrease) increase in net assets attributable to holders of redeemable shares from operations per average share outstanding

The (decrease) increase in net assets attributable to holders of redeemable shares from operations per average Class A Series A, Class A Series F, Class R Series A and Class R Series F share outstanding is calculated by dividing the (decrease) increase in net assets attributable to holders of redeemable Class A Series A, Class A Series F, Class R Series A and Class R Series F shares from operations by the average number of Class A Series A, Class A Series F, Class R Series A and Class R Series F shares outstanding during the period.

(g) Revenue recognition

Revenue related to the Fund's productive venture investments is recorded on an accrual basis. Negotiation fees are recognized upon receipt. A loan on which payments are in arrears for 90 days or more is usually classified as income impaired. Recognition of interest income ceases on income impaired loans until interest is received. Recognition of interest income ceases on principal impaired loans with all cash received applied first to principal, until fully recovered, and then as income.

(h) Short-term and long-term investments

Pending venture investments being made, a portion of subscription proceeds are invested in term deposits, high-quality government and corporate debt obligations or other investments permitted under the Act. Purchases and sales of long-term and short-term investments are recorded on a trade date basis. Term deposits are valued at cost, which approximates fair value.

(i) Commissions

A sales commission, based on the value of a subscription, is paid to the selling agent on the sale of Class A Series A and Class R Series A shares.

An annual trailer commission, based on net assets attributable to the holders of redeemable shares, is paid quarterly to the selling agent for each year that a subscription for Class A Series A and Class R Series A shares is maintained.

An annual additional commission, based on the total value of all subscriptions, is paid annually to the agent for the Fund for subscriptions to Class A Series A, Class A series F, Class R Series A, and Class R Series F shares.

(j) Incentive participation amount

As described in Note 8, an incentive participation amount ("IPA") will accrue on unrealized eligible venture investments and be paid annually only upon realization of the eligible venture investment.

This amount is an estimate and can vary significantly from year to year. It will be paid, subject to the eligible investment and the investment portfolio as a whole meeting certain minimum return thresholds, only on gains that arise on the realization of an eligible venture investment and the income earned from an eligible venture investment over its life.

(k) Income taxes

SaskWorks uses the liability method of tax allocation for accounting for income taxes. Under this method, deferred income tax assets and liabilities are determined based on differences between the financial statement and tax bases of assets and liabilities and measured using the tax rates and laws that will be in effect when differences are expected to reverse.

(l) Transaction costs

Transaction costs associated with an investment (incremental costs that are directly attributable to acquisition or disposition) are, in most cases, borne by the investee. In those cases where the Fund pays these costs they are expensed in the Statements of Comprehensive Income.

(m) Application of new and revised International Financial Reporting Standards

The following new and revised standards are not considered significant to the Fund:

- Amendments to IFRS 3, *Business Combinations*
- Amendments to IAS 1, *Presentation of Financial Statements*
- Amendments to IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*
- Amendments to IFRS 9, *Financial Instruments*
- Amendments to IAS 39, *Financial Instruments: Recognition and Measurement*
- Amendments to IFRS 7, *Financial Instruments: Disclosures*
- Amendments to IFRS 16, *Leases, COVID-19-Related Rent Concessions*
- Annual Improvements (2016 – 2019 Cycle)

(n) New and revised International Financial Reporting Standards in issue but not yet effective

The following new and revised standards issued but not yet effective are not expected to be significant to the Fund:

Effective for annual periods beginning on or after January 1, 2021 and beyond

- New IFRS 17, *Insurance Contracts*
- Amendments to IAS 1, *Presentation of Financial Statements*
- Amendments to IAS 37, *Provisions, Contingent Liabilities and Contingent Assets*
- Amendments to IFRS 3, *Business Combinations*
- Amendments to IAS 16, *Property, Plant and Equipment (PPE) – Proceeds before Intended Use*

4. Financial instruments

The Fund classifies fair value measurements within a hierarchy which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2: Inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly; and,
- Level 3: Inputs are unobservable for the asset or liability.

In Class A, long-term and short-term investments are classified as Level 2 and total \$82,000 (2019 - \$89,605). There are no long-term or short-term investments in Class R.

Class A – Venture investments

As at August 31, 2020

	Level 1	Level 2	Level 3	Total
Equity investments	\$ 60,127	\$ -	\$ 186,154	\$ 246,281
Debt investments	-	-	22,561	22,561
	\$ 60,127	\$ -	\$ 208,715	\$ 268,842

As at August 31, 2019

	Level 1	Level 2	Level 3	Total
Equity investments	\$ 64,462	\$ -	\$ 212,309	\$ 276,771
Debt investments	-	-	16,222	16,222
	\$ 64,462	\$ -	\$ 228,531	\$ 292,993

Class R – Venture investments

As at August 31, 2020

	Level 1	Level 2	Level 3	Total
Equity investments	\$ 1,133	\$ -	\$ 30,737	\$ 31,870
Debt investments	-	-	-	-
	\$ 1,133	\$ -	\$ 30,737	\$ 31,870

As at August 31, 2019

	Level 1	Level 2	Level 3	Total
Equity investments	\$ 3,188	\$ -	\$ 39,502	\$ 42,690
Debt investments	-	-	13	13
	\$ 3,188	\$ -	\$ 39,515	\$ 42,703

The table below summarizes the movement in Level 3 venture investments at fair value using unobservable inputs.

	2020		2019	
	Class A	Class R	Class A	Class R
Balance, beginning	\$ 228,531	\$ 39,515	\$ 201,157	\$ 48,380
Venture investments purchased	7,695	-	52,995	709
Venture investments repaid	(4,351)	(913)	(20,745)	(6,188)
Realized loss on disposition of venture investments	(3)	-	(53)	-
Net change in unrealized appreciation of venture investments	(23,157)	(7,865)	(4,823)	(3,386)
Balance, ending	\$ 208,715	\$ 30,737	\$ 228,531	\$ 39,515

For the purposes of the following tables, that disclose Level 3 investment details, debt investments that are current with respect to principal and interest are classified as productive and those that are not current are classified as non-productive. With respect to equity investments, those investments on which the Fund expects to recover the full amount of capital invested are classified as productive while those equity investments on which the Fund does not expect to recover the full amount of capital invested are classified as non-productive.

5. Venture investments

Venture investments are comprised of the following:

	2020		2019	
	Class A	Class R	Class A	Class R
Equity instruments at cost	\$ 184,752	\$ 39,580	\$ 187,900	\$ 40,479
Debt instruments at cost	32,117	1,203	25,629	1,218
Venture investments at cost	216,869	40,783	213,529	41,697
Unrealized appreciation (depreciation)	51,973	(8,913)	79,464	1,006
Venture investments at fair value	\$ 268,842	\$ 31,870	\$ 292,993	\$ 42,703

During the year, venture investments changed as follows:

	2020		2019	
	Class A	Class R	Class A	Class R
Venture investments at fair value, begin	\$ 292,993	\$ 42,703	\$ 255,970	\$ 54,483
Venture investments purchased	8,389	-	48,524	709
Venture investments repaid	(5,045)	(914)	(16,931)	(7,907)
Realized loss on disposition of venture investments	(3)	-	(53)	-
Net (decrease)/increase in unrealized appreciation of venture investments	(27,688)	(9,919)	5,188	(4,582)
Amortization of discount on venture investment debt	196	-	295	-
Venture investments at fair value, end	\$ 268,842	\$ 31,870	\$ 292,993	\$ 42,703

6. Loan receivable

Beginning February 1, 2004, the Fund engaged Conexus Credit Union to pay the sales commission and additional commission on the subscription for shares in any calendar year. The Fund has invested sufficient money in Conexus in the form of non-interest bearing promissory notes to enable it to pay these commissions.

The loan receivable balance is subject to a maximum total limit of \$22,750 (2019 - \$24,300) and consists of eight non-interest bearing promissory notes each repayable in eight equal annual instalments, based on the balance of the note at December 31 of the year issued, beginning January 10 of the year following issuance.

Loan receivable at August 31 is comprised of the following:

Note issued	Instalment	2020		2019	
		Class A	Class R	Class A	Class R
January 1, 2012	\$ 493	\$ -	\$ -	\$ 310	\$ 182
January 1, 2013	485	383	103	765	206
January 1, 2014	352	580	123	869	185
January 1, 2015	318	795	159	1,059	212
January 1, 2016	319	1,075	203	1,343	253
January 1, 2017	324	1,419	203	1,703	243
January 1, 2018	335	1,871	141	2,183	164
January 1, 2019	314	2,078	118	1,825	106
January 1, 2020	186	1,424	60	-	-
		\$ 9,625	\$ 1,110	\$ 10,057	\$ 1,551

As remuneration to Conexus for managing the annual payment of sales commissions, additional commissions, and other administrative services, the Fund pays a fee equal to a percentage based payment of 0.875% of the gross proceeds raised in any calendar year on the sale of Class A Series A and Class R Series A shares and 0.125% of the gross proceeds raised in any calendar year on the sale of Class A Series F and Class R Series F shares over eight consecutive years.

7. Share capital and net assets

Subscription proceeds from the issuance of Class A and Class R shares will be used to make eligible venture investments of that respective class of shares. Venture investments made by each class of shares are held only within that class of shares. Income or losses attributable to a particular venture investment are allocated only to the specific class of shares within which the venture investment is held.

Net asset value per share for each series is calculated at the end of each week by dividing the net asset value of each series by its outstanding shares. The net asset value of each series of a class is computed by calculating the value of the series-specific assets and series' proportionate share of the class' common assets less the series-specific liabilities and the series' proportionate share of the class' common liabilities. Income and expenses directly attributable to a series are credited to that series while common class income and expenses and realized and unrealized gains and losses are allocated to each series. A proportionate share of or allocation to each series of a class is based on that series' pro rata share of the total share capital of that class as at the latest available weekly net asset valuation.

Venture investments (Class A and Class R) and share subscription activity (Class A Series A, Class A Series F, Class R Series A, and Class R Series F) have a separate accounting such that the net assets attributable to each of the Class A Series A, Class A Series F, Class R Series A, and Class R Series F shares are reflected individually in these financial statements.

Class A Series A, Class A Series F, Class R Series A and Class R Series F shares have, in all material respects, the same rights, redemption features, tax credit eligibility, and attributes except for the following:

- The net proceeds from the issuance of Class A shares will be invested in Saskatchewan eligible businesses in a broad section of the economy whereas the net proceeds from the issuance of Class R shares will be invested in Saskatchewan eligible businesses in the energy and mining sectors;
- Class A Series A and Class R Series A shares have sales and trailer commissions associated with them while Class A Series F and Class R Series F do not;
- A separate net asset value is calculated for each of the Class A Series A, Class A Series F, Class R Series A and Class R Series F shares. The holders of Class A Series A, Class A Series F, Class R Series A, and Class R Series F shares have recourse only to the net assets attributable to the capital raised through the issuance of Class A Series A, Class A Series F, Class R Series A, and Class R Series F shares respectively.

The authorized share capital of the Fund is:

Class A Series A, Class A Series F, Class R Series A and Class R Series F – Unlimited number of Class A Series A, Class A Series F, Class R Series A and Class R Series F shares. The shares are voting, entitled to receive non-cumulative dividends at the discretion of the directors, entitled to elect all of those directors who are not elected by the holder of the Class B shares and have restrictions on redemption. Such restrictions include a provision that the Fund is not required to redeem Class A Series A, Class A Series F, Class R Series A or Class R Series F shares if total redemptions in the fiscal year exceed 50% of the Class A Series A, Class A Series F, Class A Series A or Class R Series F shares' net earnings after tax for the previous fiscal year. In the event of a redemption before the eighth anniversary of issue, holders of Class A Series A or Class R Series A shares are charged a redemption fee of 1% of the net asset value per Class A Series A or Class R Series A share for each year or part year remaining before the eighth anniversary of the date of issue, and the Fund is required to withhold and remit to the applicable authorities an amount equal to the Federal tax credit and Saskatchewan tax credit, if any, on the Class A Series A, Class A Series F, Class R Series A or Class R Series F shares.

Class B – 10 Class B shares. Issuable only to the sponsor of the Fund. The shares are voting, redeemable at the purchase price and entitled to elect a simple majority of the directors of the Fund, including replacing or removing any directors elected by the sponsor.

Class C – Unlimited number of Class C shares. The shares are issuable in series with rights, privileges, restrictions and conditions subject to directors' resolution. No Class C shares have been issued.

For the years ended August 31, 2020 and 2019 • (in thousands of dollars except number of shares and per share amounts)

Issued share capital at the end of the period is:

	2020		2019	
	Shares	\$	Shares	\$
Class A Series A				
Balance, beginning	18,576,382	292,131	19,006,174	287,234

Issued	1,845	22	4,490	53
Redeemed (at cost)	(5)	-	-	-
Balance, ending	12,912	155	11,072	133
Class B				
Balance	10	1	10	1

At the end of the period the net assets attributable to the holders of the Fund's Class A Series A redeemable shares consist of issued share capital of \$292,895 (2019 - \$292,131) and retained earnings of \$64,332 (2019 - \$99,350). The net assets attributable to the holders of the Fund's Class A Series F redeemable shares consist of issued share capital of \$8,898 (2019 - \$6,829) and retained earnings of \$913 (2019 - \$1,302). The net assets attributable to the holders of the Fund's Class R Series A redeemable shares consist of issued share capital of \$57,475 (2019 - \$72,254) and deficit of \$17,123 (2019 - \$11,136). The net assets attributable to the holders of the Fund's Class R Series F redeemable shares consist of issued share capital of \$155 (2019 - \$133) and retained earnings of \$20 (2019 - \$2).

The value of redeemed shares is treated as a reduction of share capital and adjustment to retained earnings or deficit. The original cost of the shares is a reduction of share capital. The difference between redemption value and original cost of the shares is treated as either a decrease to retained earnings or increase to deficit, if redemption value exceeds original cost, or an increase to retained earnings or decrease to deficit, if redemption value is less than original cost.

8. Related party transactions

The Fund has retained the Manager as the fund manager to manage and administer the business affairs of the Fund, including, among other duties, the management of the Fund's eligible venture investments and short-term and long-term investments and determining the fair value of the Fund's venture investment portfolio. The officers of the Fund are the principals of the Manager and shareholders in the Fund.

The Manager receives an annual management fee, calculated and payable monthly in arrears, equal to 2.5% of the aggregate net assets attributable to holders of redeemable shares of the Class A Series A, Class A Series F, Class R Series A and Class R Series F shares, as at each weekly valuation date.

With respect to Class A Series A and Series F shares \$9,606 (2019 - \$9,842) in management fees, plus applicable taxes, was earned, pursuant to the management agreement, by the Fund Manager.

With respect to Class R Series A and Series F shares \$1,217 (2019 - \$1,630) in management fees, plus applicable taxes, was earned, pursuant to the management agreement, by the Fund Manager.

IPA is a provision for fees payable to the Manager and is based on the realized/unrealized gains and income earned from eligible venture investments and is payable annually only upon disposition of an eligible venture investment. Before any IPA is paid on the realization of an eligible venture investment, the Fund must have:

- earned sufficient income, on all eligible venture investments, to generate a rate of return, before expenses, greater than the five-year average GIC rate plus 1% on an annualized basis. The income on eligible venture investments includes investment gains and losses (realized and unrealized) earned and incurred since the inception of the Fund, and negotiation fees, interest, dividends, royalties, distributions and earnings of any other kind from eligible venture investments;
- earned enough income from the eligible venture investment to provide a cumulative investment return, before expenses, at an average annual rate more than 10% since investment; and,
- fully recouped an amount from the eligible venture investment, through income earned, liquidation of the investment, or otherwise, equal to or greater than the entire principal invested in the eligible investee.

Subject to satisfying all of the above conditions, the IPA is equal to 20% of the return derived from the eligible venture investment.

For Class A shares \$3,747 (2019 - \$16,971), plus applicable taxes, of IPA was paid to the Fund Manager and for Class R shares \$1,532 (2019 - \$357), plus applicable taxes, of IPA was paid to the Fund Manager.

For Class A shares the accrued provision for incentive participation amount is \$35,046 (2019 - \$38,994), a net decrease, after payments, of \$3,948 (2019 - \$10,564). In respect of realized and unrealized gains, the provision for IPA decreased by \$2,126 (2019 - increase \$6,989) and in respect of income earned, the provision for IPA increased by \$2,112 (2019 - \$266) during the year.

For Class R shares the accrued provision for incentive participation amount is \$2,845 (2019 - \$6,066), a net decrease, after payments, of \$3,221 (2019 - increase \$1,019). In respect of realized and unrealized gains, the provision for IPA decreased by \$2,067 (2019 - increase \$1,286) and in respect of income earned, the provision for IPA increased by \$266 (2019 - \$109) during the year.

Other amounts and transactions due to (from) related parties are described separately in these financial statements.

These transactions are in the normal course of operations and have been valued in these financial statements at the exchange amount which is the amount of consideration established and agreed to by the related parties.

9. Net change in balances other than cash and investments

	2020		2019	
	Class A	Class R	Class A	Class R
Loan receivable	\$ 432	\$ 441	\$ 309	\$ 556
Accounts receivable and accrued income	1,189	2	(1,385)	87
Accrued provision for incentive participation amount	(3,948)	(3,221)	(10,564)	1,019
Accounts payable and accrued liabilities	(475)	(210)	54	(142)
	\$ (2,802)	\$ (2,988)	\$ (11,586)	\$ 1,520

10. Risks associated with financial instruments

The Fund's financial instruments consist primarily of cash, accounts receivable and accrued income, loan receivable, short-term and long-term investments, venture investments, provision for accrued incentive participation amount, and accounts payable and accrued liabilities. Short-term and long-term investments consist of term deposits. Venture investments in public and private companies consist of equity and debt instruments. The Fund focuses on investing in eligible Saskatchewan businesses with emphasis on expansion financing, management buyouts, restructurings, turnarounds, and early-stage investments. There is no assurance that the Fund will be able to find enough suitable investment opportunities and the Fund may face competition from other funds and investors.

There is no guarantee that an investment in shares of the Fund will earn a specified rate of return or any return in the short or long term. The shares are not eligible for resale and are subject to redemption restrictions resulting in a longer commitment than for freely tradable securities.

SaskWorks' primary business is the raising of capital from Saskatchewan residents and placing these funds in new and expanding Saskatchewan businesses. This entails exposure to market risk, credit risk, interest rate risk and liquidity risk. These risk factors may impact upon SaskWorks' ability to redeem its Class A Series A, Class A Series F, Class R Series A and Class R Series F shares when required.

Market Risk

The market risk faced by SaskWorks is the risk that the fair value of its venture investments may decline due to a reduction in the anticipated earnings generated by the businesses in which SaskWorks invests or a decrease in the quoted market share price of publicly-traded venture investments held by SaskWorks. Class A shares invest in a diversified portfolio of companies in various sectors of the economy while Class R shares invest in the oil & gas sector. Some of the companies in which SaskWorks invests are dependent upon a single product or industry. SaskWorks manages these risks through careful due diligence prior to committing funds to the investment, ensuring that the overall portfolio is properly diversified across various industry sectors, and investing no more than 10% of the Class A shares' and Class R shares' total net assets attributable to holders of redeemable shares in any one eligible business.

The Fund's venture investments in publicly traded companies are companies which were private when the Fund made its initial investment and which became publicly traded shares through initial public offerings, reverse takeovers or acquisitions by public companies. The fair values of these venture investments in publicly traded companies are based on movements in the stock market and to the success or failure of the companies. In some circumstances, it may prove difficult for the Fund to quickly liquidate investments in restricted or thinly traded publicly traded securities without unduly affecting the market prices of those securities. For these publicly traded companies, the Fund attempts to limit its exposure to fluctuations in market prices through managing the sales of these shares on the open market.

Credit Risk

Credit risk arises from the potential that a venture investment will fail to perform its obligations. SaskWorks conducts a thorough due diligence process prior to committing to the venture investment and actively monitors the financial health of its investments on an on-going basis. Changes in commodity prices and foreign currency exchange rates may significantly affect the financial position of investee companies. SaskWorks manages credit risk by diversifying its investments among industries. Although all investee companies are based primarily in Saskatchewan, most of the companies have significant sales in other provinces and/or international markets thereby mitigating most of the economic risks specific to Saskatchewan.

The maturity of each debt investment is disclosed in the respective share class Statement of Investment Portfolio. Such debt investments represent the main concentration of credit risk for the respective share class and, accordingly, represent the maximum credit risk exposure of the respective share class.

The principal and interest associated with Fund's long-term and short-term investments are 100% guaranteed by the Credit Union Deposit Guarantee Corporation of Saskatchewan.

The portion of accounts receivable and accrued income that relates to interest due from investee companies is secured by assets of the investee company.

Interest Rate Risk

Interest rate risk reflects the risk that SaskWorks' earnings will be affected by fluctuations in interest rates. SaskWorks primary interest rate risk relates to the investment of cash in short-term investments, long-term investments, and venture investment debt instruments. Based on average cash balances and holdings of long-term and short-term investments held during the period, a 1% increase/decrease in interest rates (with all other variables held constant) would have resulted in an increase/decrease in net assets of \$1,305 (2019 - \$1,608) with respect to Class A shares and \$157 (2019 - \$233) with respect to Class R shares respectively. The effect of a change in interest rates on venture debt investments is detailed in Note 4.

SaskWorks manages the risk of interest rate changes by matching the duration of short-term investments, long-term investments, and venture debt investments to known liquidity requirements.

Liquidity Risk

Liquidity risk is the risk that SaskWorks will encounter difficulty in liquidating its venture investments at an amount close to fair value at the time it requires liquidity to satisfy requests by holders of Class A Series A, Class A Series F, Class R Series A and Class R Series F shares for redemption. There is no assurance that any venture investment will be able to successfully complete its business plan or sustain operations over the short term or an extended period. The Fund manages liquidity risk by becoming, if necessary, actively involved in their venture investments and continually monitoring the value of their investments. In the event of difficulty in liquidating its venture investments, SaskWorks may be required to delay the redemption of Class A Series A, Class A Series F, Class R Series A and Class R Series F shares tendered for redemption.

The financial liabilities of the Fund mature in less than one year with the exception of accrued provision for incentive participation amount. The maturity of accrued provision for incentive participation amount is uncertain and is dependent upon realization of venture investments.

11. Restrictions

Under the Act:

- Eligible businesses for the Fund are investments in businesses, defined as taxable corporations or limited partnerships that carry on business in Saskatchewan, that together with related corporations or limited partnerships, do not have more than 500 employees, and that in the taxation year preceding the investment, paid at least 25% of all their wages and salaries to employees of their permanent establishment in Saskatchewan;
- An amount equal to the tax credits paid by the Saskatchewan government, being 17.5% of the capital raised by the sale and issuance of Class A Series A, Class A Series F, Class R Series A and Class R shares to Saskatchewan residents, must be set aside until the Fund has met its pacing requirement. In 2019 and 2018 the Fund did not set aside any funds as it met the investment requirement throughout the periods;
- Direct investments in public companies with a market capitalization of \$500,000 or more are prohibited. If an investment is acquired through acquisitions or mergers and the resulting investment has over \$500,000 in capitalization, such investment must be disposed of within five years from the end of the fiscal year of the Fund of such acquisition or merger;
- New investment in agricultural land acquired primarily for rental or leasing purposes is prohibited; and,
- The Fund is required to maintain a level of innovation sector investment exposure of 25% of annual net capitalization defined as annual capital raised within the Fund less annual capital redeemed, multiplied by the Fund's 75% pacing requirement. The Fund did meet its innovation pacing requirement at August 31, 2020. If the fund had not met its innovation pacing requirement any new investments will not count towards the Fund's overall 75% pacing requirement until the Fund is onside with the innovation pacing requirement.

The Fund may not invest more than 10% of the Class A Series A, Class A Series F, Class R Series A and Class R Series F shares' total net assets attributable to holders of redeemable shares in any one eligible business, and may not invest in an eligible business if the Fund and the eligible business are not at arm's length;

Class A Series A, Class A Series F, Class R Series A and Class R Series F shares issued by the Fund can be redeemed at the option of the holder after a specific hold period, or earlier in limited circumstances. Class A Series A and Class R Series A shares redeemed before expiration of the hold period may be subject to a redemption fee.

As part of its banking relationship with Conexus Credit Union, the Fund is required to maintain a minimum of \$22,750 (2019 - \$24,300) on deposit.

The Fund is in compliance with all the above restrictions.

For the years ended August 31, 2020 and 2019 • (in thousands of dollars except number of shares and per share amounts)

12. Management expense ratio

The ratios of all fees and other expenses paid or payable by the Class A Series A, Class A Series F, Class R Series A and Class R Series F shares expressed as a percentage of the average net assets attributable to the holders of redeemable Class A Series A, Class A Series F, Class R Series A and Class R Series F shares respectively during the period are:

	2020		2019	
	IPA included	IPA excluded	IPA included	IPA excluded
Class A Series A	4.29%	4.29%	6.06%	4.22%
Class A Series F	3.10%	3.10%	5.26%	3.64%
Class R Series A	1.40%	4.71%	6.82%	4.69%
Class R Series F	1.00%	3.27%	5.51%	3.80%

13. Income taxes

Under the Income Tax Act (Canada), no income taxes are payable by the Fund on dividends received from Canadian corporations, and income taxes payable on capital gains will be fully refundable on a formula basis when Class A Series A, Class A Series F, Class R Series A or Class R Series F shares of the Fund are redeemed or capital gains dividends are paid or deemed to be paid by the Fund to its Class A Series A, Class A Series F, Class R Series A or Class R Series F shareholders. Income taxes payable on investment income are partially refundable upon the payment or deemed payment of taxable dividends.

The Fund's Class A Series A, Class A Series F, Class R Series A and Class R Series F shares record the refundable portion of their income taxes as an asset, as they intend to recover all of the refundable income taxes through the deemed payment of a dividend by capitalizing the appropriate amount of its income or realized capital gains pro-rata to the stated capital account for its Class A Series A, Class A Series F, Class R Series A or Class R Series F shares. If the Fund increases the stated capital of the Class A Series A, Class A Series F, Class R Series A or Class R Series F shares, the holder of the Class A Series A, Class A Series F, Class R Series A or Class R Series F shares will be deemed to have received a dividend or a realized capital gain and the adjusted cost base of the shareholders' Class A Series A, Class A Series F, Class R Series A or Class R Series F shares will be increased by the amount of any deemed dividend.

The Fund's Class A and Class R shares have estimated non-capital losses that may be carried forward and used to reduce taxable income in future years. These losses, if not utilized, expire as follows:

	Class A	Class R
2031	\$ -	\$ 806
2032	-	1,786
2033	-	3,282
2034	-	2,677
2035	-	7,234
2036	-	7,728
2039	10,293	-
2040	11,842	1,966
	<u>\$ 22,135</u>	<u>\$ 25,479</u>

The potential income tax benefit of these losses has not been recognized in the financial statements.

14. Non-monetary transactions

The Fund, as part of regular purchases and dispositions of venture investments, will at times receive non-monetary consideration on the disposition of some venture investments. The non-monetary consideration can be debt instruments, shares in a publicly traded company, shares in a private company, or, on occasion, a combination of them. Non-monetary transactions are measured at the fair value of the asset received unless the fair value of the item given up is more clearly measurable. During the period the following non-monetary transactions occurred.

	2020		2019	
	Class A	Class R	Class A	Class R
Non-monetary purchases of ventures investments	\$ -	\$ -	\$ 5,164	\$ -
Non-monetary repayments on disposition of venture investments	-	-	5,164	-

15. Commitments

The Fund has committed to advance \$4,571 (2019 - \$7,053) of additional financing to existing Class A investees and \$537 (2019 - \$544) of additional financing to existing Class R investees, provided certain conditions are met.

The Fund has issued irrevocable letters of credit in the amount of \$nil (2019 - \$2,854) to an investee's financial institution. If the Fund does not pay amounts due the investee's financial institution may present its claim for payment to the Fund's financial institution through which the letter of credit was issued.

The Fund has committed to pay Conexus, subject to the performance of certain duties, an average service fee of \$3,000 as described in Note 6 based on past subscriptions to the Fund.

16. Capital management

Share capital is the source of capital for the Fund. The Province of Saskatchewan has authorized the Fund to issue up to \$35,000 (2019 - \$35,000) of share capital during the period from April 1, 2020 to March 31, 2021 and annually thereafter.

The Fund's capital management objectives are to enhance the net assets of the Fund through managing its funds to maximize cash flows from investments and for sufficient liquidity to:

- fund venture investments in new eligible companies and follow-on investments in existing companies;
- meet the annual investment obligations required in The Labour-Sponsored Venture Capital Corporations Act (Saskatchewan);
- fund the redemption of shares requested by shareholders; and,
- fund ongoing operations.

The Fund actively monitors the cash position and financial performance of the Fund to ensure there are sufficient resources to meet venture investment requirements and shareholder redemptions. However, in the event of insufficient resources, SaskWorks may be required to delay the redemption of Class A Series A, Class A Series F, Class R Series A and Class R Series F shares tendered for redemption.

There were no changes in capital management policies during the year.

17. Net assets of the Fund

In 2020 and 2019, the Fund's auditors, MNP LLP, Chartered Professional Accountants, as an integral part of their audit procedures, reviewed the fair value of the Fund's portfolio in the aggregate, as presented in the Statements of Investment Portfolio, to determine that such fair value is, in all material respects, reasonable. The auditors employ a Chartered Business Valuator as a member of the audit team.

18. COVID-19

At August 31, 2020 the full economic impacts of the COVID-19 pandemic were not yet known. Venture investment valuations at year end reflect the effects of the pandemic to date which in most cases resulted in negative adjustments compared to 2019. However, additional adjustments after August 31, 2020 may be necessary as the full impact becomes known and are better understood. If additional adjustments are required, it is expected these will have a negative effect on the net assets of both Class A and Class R shares. Any negative adjustments because of the pandemic and any additional negative adjustments may be temporary and could reverse if the economy improves.
